## A SOLUTION DESIGNED FOR SAVINGS.

At American Standard Heating & Air Conditioning we design our products to work together seamlessly. When we configured our hybrid split systems we combined the power and efficiency of our heat pumps with the comfort and reliability of our furnaces. With energy costs as unpredictable as ever, our hybrid split systems offer two energy sources, giving your family the comfort, flexibility and peace of mind they deserve.

### How our Hybrid Split System works.

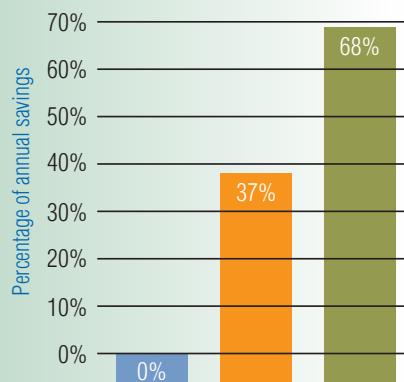

In winter a heat pump uses electricity to capture the heat that is always present in the outside air and pumps it back into your home, while a furnace burns natural gas or oil to heat the indoor air. With a hybrid comfort system, the best heating option is selected according to weather conditions and utility prices. To ensure cost-effectiveness, your independent American Standard Heating & Air Conditioning dealer will determine when your system should automatically switch from electric to gas or oil heat. However, you may also use a programmable Comfort Control to run your system in the most economical fashion.

While your hybrid comfort system can help provide greater savings on your heating bills, the components also work together to bring you effective, efficient cooling. In the summer, the heat pump functions as an air conditioner, pulling the heat out of your home and releasing it outdoors. In addition, the electric fan blower in the furnace helps circulate cool air from the heat pump throughout your home.

This example is based on weather conditions in Chicago and average national utility costs. Potential energy savings may vary depending on your lifestyle, system settings, equipment maintenance, local climate, home construction and installation of equipment and duct system. To find out how much you can save on energy costs in your area, ask your dealer for details.

- A/C and furnace 10 years old or older
- High efficiency A/C and furnace
- Ultimate Hybrid Comfort System

### Average annual utility cost savings a Hybrid comfort system can provide.

Platinum Series  
Heat Pumps

Platinum Series  
Gas or Oil Furnaces

### Platinum Series

Gold Series  
Heat Pumps

Gold Series  
Gas Furnace

### Gold Series

Flexibility and efficiency are yours with American Standard Gold Series systems. The high quality craftsmanship of our Gold Series heat pumps and gas furnaces take your comfort and savings to a whole new level.

Silver Series  
Heat Pumps

Silver Series  
Gas or Oil Furnaces

### Silver Series

Durability has never felt so comfortable. With our Silver Series combination of heat pumps and gas or oil furnaces, you can rest assured knowing your savings will last as long as the split hybrid system itself.

### Take comfort to an even higher level.

Ready for the cleanest possible indoor air? The AccuClean™ Whole-Home Air Filtration System removes up to an astounding 99.98% of allergens from filtered air, capturing particles down to .1 micron. In fact, AccuClean™ is 100 times more effective than a standard 1" throwaway filter or ionic-type room appliance, so you know you're getting a home air filtration system like no other.

Ionic-Type Room Appliance	1" Throwaway Filter	Typical Room HEPA Appliance	Whole-Home 5" Media Filter	Whole-Home Electronic Filter	Whole-Home AccuClean
10	12	150	240	660	1200

Ratings of cubic feet per minute of clean air delivered for a typical 3-ton heating and cooling system: the higher the value, the more effective the air cleaner.

Clean air delivery rate (efficiency times airflow rate) is recognized by the Federal Trade Commission (FTC) and Environmental Protection Agency (EPA) as a fair and objective measure of various air cleaner technologies.
